Project Description:

Report Period: Monday to Saturday

Project Status

Date	Task Done	Explanation	Visited Office
29-12-2025	Revised ViewBag, TempData, Model & Control Structures	Revised core MVC concepts such as ViewBag , TempData , and Model usage . Practiced basic programming constructs including loops and if-else conditions to strengthen logical understanding within MVC applications.	
30-12-2025	Repository Pattern & Data Passing Techniques	Studied the Repository Pattern to understand separation of concerns. Learned how to pass data from Model to Controller using ViewData , ViewBag , and TempData with practical examples.	☒
31-12-2025	Strongly Typed Views & UI Framework Setup	Learned the concept and advantages of Strongly Typed Views . Installed and configured Bootstrap , Tailwind CSS , and jQuery . Also understood the role of the	☒

		_ViewImports.cshtml file in MVC projects.	
01-01-2026	Tag Helpers & Form Elements	Studied Tag Helpers and their benefits over HTML helpers. Implemented Image Tag Helper and created forms using Tag Helpers including TextBox , Dropdown , Radio Button , TextArea , and Label controls.	
02-01-2026	Model Binding & Validation	Learned Model Binding concepts and implemented dropdown lists using Tag Helpers . Studied Model Validation techniques to ensure proper data validation on both client and server sides.	

Summary:

- Revised key ASP.NET MVC concepts including ViewBag, TempData, models, and basic control structures such as loops and conditional statements.
- Learned and implemented the Repository Pattern along with different methods of passing data between Model and Controller.
- Gained practical understanding of Strongly Typed Views and configured UI frameworks like Bootstrap, Tailwind CSS, and jQuery.
- Studied Tag Helpers in detail and created forms using various Tag Helper controls such as dropdowns, radio buttons, and text areas.
- Implemented model binding and validation to ensure structured data handling and input validation in MVC applications.
